Thirty-second Year.

GRIMSBY, WEDNESDAY, JULY 19th, 1916

\$1.00 Per Year in Advance

J. AMBROSE PETTIT SUDDENLY PASSES AWAY ON SUNDAY AFTERNOON LAST

He was in Excellent Health and Spirits on Saturday but on Arising Sunday Morning was Seized with a Stroke from which he Never Recovered.

56 YEARS OF AGE

"Brose" was one of the most prominent fruit growers in this District and took great interest in Everything Pertaining to the Welfare of the Community.

The citizens of GRIMSBY and North GRIMSBY were greatly shocked Sunday evening, July 18, to learn of the sudden death of Mr. J. Ambrose Pettit, one of the most prominent citizens of this locality.

The deceased gentleman had been in poor health about six months ago, but had sufficiently recovered so that he was rapidly regaining his former robust health and when his death occurred almost without a moment's warning, the shock to his friends and relatives was very great indeed. He had been in the Village of GRIMSBY several times during Saturday and spent Saturday evening on the streets chatting and talking with his friends, and feeling unusually well. He retired late Saturday night in better health than he has enjoyed for the past six months.

About nine o'clock Sunday morning, when preparing to dress, he was seized with paralysis and his condition became very serious. Although he remained conscious for about an hour and a half it was with difficulty that he could talk. About an hour and a half after the seizure Mr. Pettit became unconscious and remained so until the time of his death which occurred at three o'clock in the afternoon. Thus passed away peacefully and without pain, one of the best known men in social circles in the County of Lincoln or Westmorland, at the early age of fifty-six years.

The late J. Ambrose Pettit, or as he was popularly known, to all his friends "Brose" was born in the Township of Lincoln, Ontario, and was fifty-six years of age at the time of his death.

His father, the late Jonathan R. Pettit, was one of the most successful grain and stock farmers in this part of the country, and in fact became known throughout the Province as a breeder of high class, pure bred Shorthorn Durham cattle in the days when this breed became so popular and high-priced in Canada. The late J. R. Pettit was so successful that he was able to leave his two sons, J. Ambrose of GRIMSBY, and Chetwood of Stamford, Ont., in very comfortable circumstances.

After the death of his father, J. Ambrose sold off a considerable quantity of the large farm, invested the money, and settled down to the quiet life of a prosperous fruit farmer. He was a man of very regular habits, being an early riser and taking a keen delight in the work of his farm, and in all social affairs in the locality. He was a man of excellent judgment on any subject that he took an interest in. He was well versed in the varieties of fruits, methods of growing, and was an enthusiast on flowers and particularly roses. It will be remembered that his beautiful row of rambler roses nearly a quarter of a mile long, attracted universal attention from citizens and from travellers for years.

Although he was never a candidate for any office he took a keen interest in municipal affairs and politics being a staunch conservative, the same as his father before him. He was a liberal supporter of sports such as hockey, cricket, baseball and horses, he himself, being formerly a first class cricketer and his brother Chetwood one of the best, in the olden days, when the GRIMSBY Cricket Club toured the Province.

He was a leader in social affairs, taking a very keen interest in dancing, and was always welcomed at parties, at homes and assemblies even by people very much younger than himself.

The late J. Ambrose Pettit was married in 1882 to Miss Janet Scott, (step daughter of the late D. Burkholder), then of GRIMSBY, formerly of New York State, she survives him. The funeral took place Tuesday afternoon, July 18th, at three o'clock and was very largely attended by friends, relatives and acquaintances. Service was conducted at the house and in Queen's Lawn Cemetery by the Rev. J. A. Ballard, Rector of St. Andrews Church.

The deceased gentleman is survived by his wife his three daughters, Mrs. H. Wolfenden and Mrs. J. M. Powell, of GRIMSBY, and Eleanor at home, and one brother, Chetwood of Stamford, Ontario.

The pallbearers were: C. A. P. Smith, Murray B. Smith, Egbert M. Smith, F. W. Pottinger, A. F. Hawke and David Allen.

LIEUT. ALFRED RIMMER KILLED IN ACTION

The casualty lists last Tuesday contained the name of Lieut. Alfred Rimmer, GRIMSBY, killed in action. Very little is known of Lieut. Rimmer, in GRIMSBY, very few, it is possible any, ever having met the gallant young man. He is a son of Mrs. Rimmer of Robinson St. She moving here with her family from Brighton about a year ago.

Lieut. Rimmer was born in England and came to Canada when quite a young boy. He enlisted for Overseas with a Toronto battalion, giving up a good position in that city to do so.

Two brothers of the dead Lieutenant are also on Active Service with the Canadians. One of them now being in hospital wounded.

AND "SMOKE" WENT UP THE CHIMNEY JUST THE SAME

Well! Well! Well! And the Tack eaters had to bite the dust the second time at the hands of the "Scum of the Earth," but this time the score was only 14-13.

Mr. Roy Norton who has pitching aspirations a la Mathewson, after being trimmed to a frazzle last week, tried to come back and retrieve his lost laurels but it was no go. He was dickered in the sixth innings and the great and only "Smoke" McBride C.O.D. was rushed into the breach, but the "Smoke" went up the chimney just the same.

In the last half of the eighth the Tacklers tied the score up, and in their half of the ninth made a lead of one but the "Scum" came back strong and pounded out two thus winning the titanic struggle by an eyelash.

Mr. Edward St. John, once a noted ball player from around these digns, but now a fighting Trooper from Col. Brook's C.M.R.'s was home for a brief stay and did the receiving for the "Scum" with "Beef-Trust" Walker doing the heaving.

It was some game, but our only regret is that the season is beginning to tell on the great "Smoke" and like Mathewson he will soon be relegated to the minors. A deal is now on to trade him to Kintore for a load of hay and a couple of sheep.

INFANTILE PARALYSIS

What is it?

The following instructions regarding Infantile Paralysis are issued by the Provincial Board of Health:

Infantile Paralysis, also called Anterior Poliomyelitis, is a communicable disease chiefly of children between the ages of two and fourteen years. Older children and adults may also be affected by the disease.

The cause is unknown. It is known, however, that the agent causing the disease is present in the secretions of the nose and mouth and in the intestinal tract from being swallowed.

The disease is epidemic in some United States cities and in at least one town in Ontario.

It is believed that Infantile Paralysis is spread from one child to another by means of the secretion of the nose and mouth by direct transfer. It is possible also that it is spread by flies which have been in contact with cases of the disease may harbour the contagion and give it to others without contracting the disease themselves; that is they are "carriers."

What To Do About It!

(1) Every CASE must be quarantined for a period of SIX weeks.

(2) All children who have been in contact with a case must be quarantined and kept under observation for a period of TWO weeks.

(3) Adult members of the family who are wage earners may be allowed to go about their work subject to the regulations of the Provincial Board and on the discretion of the Medical Officer of Health.

(4) Where there is an outbreak, gatherings of children, such as picnics, picture shows, and playgrounds, should be prohibited.

(5) The source of origin of each case should be carefully enquired into in order that proper quarantine may be maintained.

(6) In houses where cases appear all doors and windows should be screened, the premises kept clean, and no accumulation of garbage or waste permitted.

(7) All cases should be at once notified to the Medical Officer of Health, and by him to the Chief Officer of the Provincial Board.

(8) Mild cases, showing slight headache, rise of temperature and vomiting persisting for a few days, with slight muscular weakness and

The members of the Masonic order gathered at the lodge room, and joining the funeral procession in the Village marched to the cemetery where the Masonic funeral ceremonies were conducted.

LIEUT. JOHNSON DOING WELL

Further information has been received about the wounding of Lieut. Johnson. On Wednesday afternoon last the following telegram was received by his mother, Mrs. Thos. Johnson:

London, Eng., July 12, 1916

Mistress Johnson, Grimsby, Ont.
In fourth London General Hospital, Denmark Hill, London, slight wound.
A later cablegram states that his wound is a bayonet thrust in the fleshy part of the thigh, and that he is progressing very favorably.

MORE NAMES FOR HONOR ROLL

GRIMSBY'S Honour Roll, printed in last week's INDEPENDENT, caused a considerable amount of favorable comment amongst our readers. The people of this district knew that GRIMSBY Town and Township had supplied a lot of men for overseas, but they did not think the roll of honor was so large. This section has certainly "done its bit" and is willing to do more.

The Roll printed last week is far from being complete and we would like all the people of the Town or Township who have relatives or friends from here, who are serving their King and Empire whose names do not appear on the Roll, to send them in to Supl. Brimley at once.

Since last week the following names have been added to the Roll:

Lieut. Rimmer, Alfred B. (Killed in action.)
Pte. Woodverton, W. B.
"Konkle, Herbert
"Kitchen, Robert
"Kitchen, Edw.
"Garr, Harry H.
"Rimmer, Harry

The name of "A. Russ" appearing in last week's list, should be R. C. Russ. He is a son of Mr. and Mrs. F. A. Russ, GRIMSBY East.

SEND IN YOUR NAMES

THE H. G. & B. FRANCHISE

The franchise giving the H. G. & B. running rights through GRIMSBY runs out to-morrow (Thursday) night at midnight, July 20.

Just what action will be taken by the Town Council re the granting of a new franchise is at unknown matter at the present time. The Town Fathers are waiting to see what the outcome of the County Arbitration will be.

The H. G. & B. and Lincoln County Council could not arrive at a suitable agreement and the matter is now going to Arbitration. The H. G. & B. in this case are taking their usual course of demanding everything in sight but are not willing to pay anything for it. They want everything their way and the County gets nothing.

The Town Council are waiting anxiously the settling of the County end of the matter so that they can get to work.

It is a foregone conclusion that the H. G. & B. are going to do the square thing by GRIMSBY or get no franchise. They must do a number of things that need attention badly, or else get another right of way.

The High Moguls of the H. G. & B. have run their railway and taken the people's money just as they please in the past, but that time is over. They must "come clean" with the public from now on or else get out of business and let real railroad men run the road.

When the H. G. & B. and the Town Council come together on the franchise question, there is going to be a third party have something to say and that is the INDEPENDENT. The H. G. & B. may be able to put up a bluff and boast to the Town Fathers, but they will have the time of their sweet young lives blurring the INDEPENDENT.

We will fight the H. G. & B. on the franchise question to a finish. They will have to give better service through this district, or else get off the job.

THE CRUISE OF THE PRUSSIAN KING

stormy sea. And the Kaiser had said to his son and heir, "We're out for a jubilee."

Says Willie "To murder and burn and rob it surely is a treat."

But there's one thing makes me awful scared, it's the sight of the British fleet—

"Or sonny, you don't know your dad, I'll show them what I'm like."

I'm just about the biggest bluff that ever crossed the pike. For I'm the mate and the captain bold and the admiral, too, you see.

I'm the gink with the iron cross from Berlin on the Spree."

Then up spoke old Von Tirpitz with all his might and main,

"I've sent the ships to the Kiel Canal, for I fear a hurricane."

The Kaiser sat in his boom-proof car, a cigar butt in his mouth,

And he heard the war reports come in from the east and west and south.

"Say papa, I hear a noise like guns, whatever can it be?"

"Oh, I guess it's a British man-of-war; they float on every sea."

"Say papa, I hear a row down east, whatever can it be?"

"Oh that's the return of the Russian bear and he'll soon be after me."

"Our money is at a discount, dad, and the Turks are on the run."

And the Frenchmen put it all over us at the battle of Verdun.

That row we raised in Ireland to fool the British ruler

Has gone completely on the blink and Sir Roger's in the cooler."

"Say, boy, there's no one else in this world can run this joke like me."

I'll build about four billion subs, and live by piracy."

Then from the land of the Southern Cross, through the blinding sleet and snow,

Came some transports filled with Australian troops to add to the Prussian's woe.

Faster and thicker came the news of battles west and east.

The cigar butt dropped into the mud, and the Kaiser frothed like yeast.

"The larger beer is getting low, say daddy, there's the rub. And the British fleet is blockading us, and we are getting short of grub."

Then the Kaiser swore some German swear; till his generals stood aghast

And he took a pound of Limburger cheese and nailed it to the mast.

"Say daddy, I hear a louder noise, whatever can it be?"

"Oh, that's more of Lincoln's Grimsby boys and it means our finish, see!"

John W. McCullough,

Chief Officer of Health for Ontario.

Proclamation

I hereby proclaim Monday, Aug. 7th, 1916 to be CIVIC HOLIDAY, and I call upon the Citizens of GRIMSBY to observe it as a public holiday.

W. F. RANDALL, Reeve.

GRIMSBY, JULY 18th, 1916.

CONSERVATION DEPARTMENT OF RED CROSS APPRECIATED GRIMSBY FRUIT

A WINTER'S WORK

The Radiant Electric Co. will resume work in the munition department, Monday the 24th, with over fifty men employed throughout the Fall and Winter.

SUCCESSFUL PUPILS AT ENTRANCE EXAMINATIONS

Grimsby

Ned Andrews (Hon.), Harold Argles, Jane Bentley (Hon.), Arthur Brown, Walter Brown, W. B. Bingle, Ursula Christie (Hon.), Eleanor Coulson, Marie Corman, Melville Dale, Harry W. Daw, Gordon W. Drope, Greta Farrell, Arthur Groat (Hon.), Mabel Garr, Milman Krick, Waldemar Kelterborn (Hon.), Lila Kidd, Vida Moffat, Florence Monaghan, Florence Norton, Dorothy Le Patourel, Wilfrid Pettit, Chas. Russ, Geo. Simpson, Robert Smith, Myrtle Smith (Hon.), Agnes Tuck, William Wyllie, W. W. Reg. Watkins, Mary Walker, Jean Walker, Gertrude Waller, Hazel York.

34 candidates.

Vineland

Blossom Albright, Edgar Brown, Ina Burkholder, Willie Kratz, Gladstone Moyer, John Novak (Hon.), Mary Reakes, Grace Scott, Margaret Small, Gladys Wismer, Hazel Wismer.

Ferriek

Gladys Althouse, Doris Blumer, Cecil E. Fegan, Cynthia Miller, Olive Metter (Hon.), Elsie Nuendorf (Hon.), Winnie Nelson (Hon.), Lella Strong, Audrey Thompson (Hon.).

Wellandport

Rhoda Anderson, Jack Jenkinson, Roma K., Romaine K. Ross, Fred Travers.

Beamsville

Clara Beamer, Howard G. Boughner, Andy Comfort, Margery Lakard, Dora Fraleigh, Edward Freure, Clifford Houser, Kathleen Jemmett, Harding Jones (Hon.), Paul Jones (Hon.), Lily Moyer (Hon.), Pearl Moyer (Hon.), Marguerite Moyer, Chas. Shepherd, Grace Southward, Frank Wickware, Ethel Denison.

Calistow Centre

Horace Adkinson, Elda Black, Gladys Packham, Margaret Packham, Clifford Parker, Keith Young.

Smithville

Arthur Burch, Violet Davis, Clifford Hitchcock, Clinton Hitchcock, Basil Lounsbury, Matilda Olin, Marie Stuart Joyner, Gladys Lounsbury, Tremblay, Phyllis Zumsteln.

INVESTIGATE STATE ROADS.

The representatives of the County Council, returned on Saturday night from their trip into New York state to inspect the roads in connection with an enlarged County Road system for the County of Lincoln.

The party was met at Niagara Falls, N. Y., by Divisional Engineer C. J. McDonough of the State Highways department, P. J. Schoenlaub, Divisional Engineer; B. E. Moses, State Engineer for the County; H. S. Ball, County Engineer for the County of Jefferson and others. Two autos left from St. Catharines and they were met by two across the river.

The whole party proceeded on their way and went from the Falls to Lockport, thence to Buffalo. The trip also included a journey to Rochester, etc. In speaking of the tour this morning County Treasurer Wismer a member of the county party, stated that anyone who made the trip could not help being impressed with the splendid roads. He spoke very highly of all the roads visited, especially of the Buffalo-Rochester road along which he stated the cars simply glided. This road which has been in constant use for the past two years does not show the wear of traffic which is somewhat heavy.

The road does not require using and is in the mind of the Treasurer a masterpiece in the line of road construction. The roads were built according to the traffic and to the condition of the place through which they passed. In this manner the right kind of a road was built in the right place. For the past eighteen years the Engineer of New York state have been working on their roads and this is the reason for the excellent roads which they are able to construct at the present time.

This trip was arranged by Mr. George C. Delib, Erie County Engineer and the party was in charge of Mr. Charles J. McDonough, Divisional Engineer in charge of the State Roads.

Gifts From Fruit Growers Last Year Were Greatly Enjoyed by Wounded Soldiers in English and French Hospitals

GIVE! GIVE! GIVE!!!

This Year the Committee can Handle A Greater Quantity and Will be Pleased to Have Donations From This District

That the large quantity of fruit donated by the fruit growers of this district last year was appreciated by the people in charge of the campaign and by the soldiers in hospital, is shown in the following letter:

Hamilton, Canada,

July 18, 1916

To The Editor of the "Independent," Grimsby, Ont.

Dear Sir:—The fruit growers of the Grimsby District will no doubt be pleased to learn that through their generous gifts of fruit to the Canadian Club Fruit Campaign of last year, the success of the undertaking was more than gratifying.

It is a great pleasure to know that from the Hospitals, the Matrons, the Doctors and the wounded patients all along the line have written to those in charge to say that nothing was received in the hospitals that was half as much appreciated as the fruit put up in glass and forwarded to the Red Cross to the Overseas Hospitals. So successful was our undertaking—and only made possible by the co-operation of the fruit growers—that the Red Cross Society's Executive requested those in charge of last year's operations to assume the responsibility this year on behalf of the Canadian Red Cross Society. This we have accepted relying upon the sure support of the fruit growers of the Niagara District.

We have equipped a kitchen at 22 S. Park Street, Hamilton, having 6,000 square feet of floor space, and are in a position to handle 2,500 quart jars of fruit a day. This plant is now being equipped with all the latest fruit jars, and we would ask all fruit growers to send their fruit to this plant for the Red Cross Society, 22 S. Park Street, Hamilton, and all kinds of fruit. The H. G. & B. Ry. are transporting this to us over their lines free of charge as their share of the work.

Yours very truly,
T. N. MacBeth,
Honorary Manager,
Canadian Red Cross Society,
Fruit Department.

This year, as the letter states, a larger quantity than ever can be taken care of by the committee.

At the meeting of the fruit growers on Saturday night last a committee was formed to handle the work on this end of the line and the growers have promised to supply the Conservation Department with all kinds of the choicest of fruits.

If you have any fruit that you would like to donate to this worthy work communicate at once with Mr. W. J. Drope.

RECRUITING FOR

THE BANTAMS

Lieut. G. Walsh, of Hamilton, spent Thursday of last week in GRIMSBY recruiting for the Bantam Battalion for overseas service.

Lieut. Walsh is the chief recruiting officer for Western Ontario with headquarters at Hamilton. He would be pleased if any small men in GRIMSBY or vicinity who would like to go overseas would call on him at his office, 17 King St. East, Hamilton.

Lieut. Walsh has had good success in recruiting for the Bantams, and this Battalion will be up to strength in a few weeks, but a few more men are wanted. The size is five feet two inches and under.

APPLE CROP PARTIAL FAILURE

Ottawa, July 12, 1916.—The following information has been received by telegram at the office of the Fruit Commissioner this morning, relative to the apple situation in Ontario:

East of Toronto the crop is very disappointing and will not exceed that of 1915. There has been very serious development of scab, and a heavy dropping of fruit in all sections. Unsprayed orchards are practically worthless on account of poor quality. There has been some damage by hail in the Cobourg district. In western and northern parts of the province there is a medium crop, but the quality, particularly in western Ontario, is good only in well sprayed orchards.

Facts and Fancies

By Frank Fairborn

Berlin was first amazed then dismayed at the manner in which the British and French forces smashed the first and second lines of defense erected by the Germans on the western front.

When the British with their tremendous artillery bombardment and then their terrific infantry assaults carried the first line on the German front on the Somme, Berlin was amazed because the people had been led to believe that these defense works along the first line of trenches were practically impregnable.

Yet the newspapers pointed out and the war office admitted that with such tremendous gun power as the British and French had brought to bear that the breaking down of the first line of trenches was not an impossible feat, but the enemy would find a more difficult task when they assaulted the second line of trenches.

The assault has come and passed and the British apparently carried the second line of German defense as easily or in fact more easily than they did the first line, and some of the troops in their impetuosity even pierced the third line.

Information from Berlin by way of Amsterdam on Sunday, July 16th indicates that the people of Berlin viewed the last feat of British arms with dismay and are now wondering in fear and trembling what the next move will be.

The British army prepared for those two drives as they prepared for everything else, slowly and methodically, but when everything was ready and the word given there was no looking back. Smash! Bang! First the tremendous bombardment by the heaviest artillery in the world and second the irresistible assault by British soldiers that never think of retreating.

When the first line of trenches were won the British army immediately began to prepare for its attack on the second line and when the second line of trenches were won the army immediately got busy preparing for its attack on the third line.

British hearts are glad and British hopes are high as the result of the success met with by British and French troops in the first two offensive drives and while we may look for some reverses yet if Britain and her colonies keep their shoulder to the wheel ultimate success is assured.

Britain's long delay in an offensive in the early part of the war arose from two causes, first shortage of trained soldiers, second shortage of war material—Germany had plenty of both as that country had been in a state of preparation for many years while Britain's energies had been spent in industrial and commercial enterprises with little thought of war.

In later stages of the war Britain seemed to have plenty of men but lacked material, lacked in big guns, in high explosives and in other war munitions. But in June, 1916, General Joffre and General Haig were convinced that Britain was ready, that she had lots of men and lots of material, and her preparations were made for a big united drive of French and British forces.

At the rate that war munitions are being used up every day in bombardment it will keep the munitions factories busy to keep up the supply so that there should be no let-up in the work as long as the terrific wastage goes on.

As it is with munitions so it is with men. There are plenty at the front at present but the wastage in killed, wounded, prisoners and sickness is so great each week that there must be a constant supply of fresh volunteers offering themselves at all times in order to keep the army up to its full strength and standard of efficiency.

Canada with all the other colonies has done nobly in the supplying of men, money and material.

Not only has Canada enlisted over 350,000 men but she has hundreds of factories busy turning out munitions and she has subscribed promptly to a war loan, and besides all this she is growing the wheat that feeds the soldiers. So that Great Britain is assured of safety from war famine so long as her fleet remains Mistress of the Sea. In addition to her wheat Canada has supplied many other agricultural products such as horses, nickel, and iron.

AN EXTENSION OF TIME TO AUGUST FIRST

A great many of the subscribers to The Independent have complained that they were not able to take advantage of our offer of renewing their subscription at the old price of \$1.00 per year up to July 1st. Some claim that they overlooked it, others claim that they were not in a position to take advantage of the offer while still others had intended to take advantage but forgot it at the last moment. In order to do what is fair with all the subscribers and in order to give them all an opportunity to renew their subscriptions for another year or two years at the old price of \$1.00 per year we have extended the time for one month so that the new price will not come into force until August 1, 1916.

This will give every person who desires to renew at the old price an opportunity to do so within the present month as after August 1st the new price will positively go into force.

We know it is a hard thing to change the price of a newspaper even though the publisher is losing money on it, yet reasonable people ought to know that the prices on all kinds of commodities have changed frequently even some commodities having the price changed weekly, yet the public pay the advanced price with very little grumbling.

The commodities that enter into the production of a newspaper have increased in price more since the war began than almost any other commodity in use in every day life in Canada and yet a great many people seem disinclined to pay the increased price for the paper after it is produced and applied to pay the increased price for the paper at a loss although we have got to pay the increased value for everything we buy whether we like it or not.

From now until August 1st, we will accept renewals to The Independent for either one year or two years at the old price of \$1.00 per year. This will give our subscribers, who wish to take advantage of it, an opportunity of getting their paper for the increased price for the paper after it is produced and applied to pay the increased price for the paper at a loss although we have got to pay the increased value for everything we buy whether we like it or not.

numerable other things to help Britain take her share in the destruction of Prussianism.

What Canada is doing Australia and all the other colonies are likewise doing in their own way and with their own products.

The main thing now for true Britons everywhere is to vow that there will be no let-up until victory is assured. Men should enlist so that the pressure may be kept up. Munitions should be turned out as rapidly as possible. Farm products should be grown and harvested and sent forward. Everything that Britain needs that Canada can supply should be put at her disposal in order that the pressure, the tremendous pressure of Britain's power may be felt in the final and closing days of the war.

The Grand Duke Nicholas, who waged such a successful campaign in the Caucasian Mountains early in the season, is once more on the war path. This time he has captured Baidurt, a strategic point in Turkish territory.

The Russian attack was so fierce and so sudden that the Turks fled without even their tents, and the Cossacks are now pursuing them.

While the campaign of Grand Duke Nicholas is far away and might appear to have little influence on the war in Europe yet this campaign has been a most important feature in carrying out the allied plan of campaign.

By the fierce Russian onslaught through the Caucasian Mountains the Turks were forced to turn their attention to the east instead of the west, and the result was that the allied forces at Salonika have not been interfered with since Russian Caucasian campaign started.

And by the way the 750,000 allied force at Salonika are there for a definite useful purpose and that purpose is to keep two of the Balkan states in terror of allied armies, and these two are Greece and Bulgaria.

Had it not been for the fear of the Lord which was put into the hearts of the rulers of Greece, that country would have been allied with Germany ere this, and had it not been for the wholesome fear which the troops at Salonika put into the hearts of the Bulgarians that country would have been sending armies to assist Germany and Austria long ago. As it is Greece and Bulgaria have remained quiet and when the proper time comes the army at Salonika will strike Bulgaria and strike her hard because little Serbia must be avenged for the devastation of her territory last fall and winter.

Italy is quite busy at the present time and she is keeping the Austrians or a good portion of them busy also. In the meantime she is winning a little day by day just enough to make Austria feel that Germany can fight her own battles on account of the fact that she has troubles enough of her own.

Up till last week Bouslof kept the German-Austrian armies on the east on the jump to hold their own or keep out of the way. This week nothing startling has occurred on the eastern front but one great advantage of the Russian campaign is that it prevents the Kaiser from drawing troops from the east to help his armies on the west.

Dear old Verdun!—Your name shall live in history and always be revered by every Briton and Frenchman throughout the world. Three more days and you will have shown the Crown Prince and the German General staff that they have bitten off more than they could chew. The path to Verdun is like the rocky roads to Dublin, they have hard travelling.

Early in June the Crown Prince and the General staff of the German army announced that their original intention was that Verdun would fall to German arms by July 21st, but that their success had been sufficient to warrant their making the statement that Verdun would fall by July 1st or before July 3rd.

The only remarkable thing that happened in the war on July 1st, was the terrific offensive drive made on the west by the French and British armies much to the dismay and loss of the Germans, and up to date the only thing that has happened as far as Verdun is concerned is a see-saw with first German soldiers making gains and then French soldiers making gains in counter attacks so that I am quite safe in stating that July 21st will pass and Verdun still be safely within the French lines.

The Crown Prince was so determined on the capture of Verdun that when the big British offensive drive came he would not allow any assistance to go from the vicinity of Verdun and still kept up his assaults on the French lines and up to date it seems to be still his policy and he seems to be still determined to take Verdun if such a thing is possible.

I predict, however, that if the British and French offensive keeps up on either side of the river Somme that it will not be long till the Crown Prince will come to the conclusion that there is more important work for his men than trying to win a hollow victory at Verdun.

Determination and bullheadedness is a grand thing in a soldier, but there is such a thing as a man beating his brains out against a stone wall, and that apparently is what the Crown Prince has done to a great extent at Verdun.

SOUTH GRIMSBY COUNCIL SPECIAL MEETING

A special meeting of the South Grimsby Municipal Council was held in Brant's Hall on Tuesday, July 4, 1916, at 8 o'clock p.m. All the members being present with the exception of Councillor Juhlke.

The meeting was called by the Reeve to consider tenders for the repair of the Dishier and Kettle bridges and for other business.

Tenders from C. North and Messrs. Griffin and Rinker were read: The North tender being \$3.50 per cub. yard if municipality furnished all material, or \$8.00 per cub. yard if tenderer furnished all material. The Griffin tender was for \$8.00 per cub. yard, the parties tendering to raise the Dishier bridge and furnish all material.

Moved by Mr. Boulter seconded by Mr. Durham, that this Council accept the Griffin tender for the work and material on the Dishier and Kettle bridges, the work to be completed by Aug. 1st, 1916. Carried.

Moved by Mr. Middaugh, seconded by Mr. Boulter, that this Council do now adjourn. Carried.

EIGHTH MEETING

The Municipal Council of South Grimsby Township, met, pursuant to adjournment, at Brant's Hall, Smithville, on Monday, July 10, 1916, at 1 o'clock, with all of the members present.

The minutes of the last regular and special meetings were read and confirmed.

Moved by Mr. Boulter, seconded by Mr. Middaugh, that the following accounts be paid: Walter Young, R. Div. 1 and 2, \$33.80; Canada Ingot Iron Culvert Co., 5 culverts, \$55.20; S. Frank, for 4 iron beams, \$35; Wentworth Quarry Co., for 1 car of stone, \$35.21; Exeter Mfg. Co., 2 Simplex drags, \$27; N. M. Irvine, R. Div. 2 and 3, \$33.90. Carried.

Moved by Mr. Juhlke, seconded by Mr. Durham, that the following accounts be paid: J. A. Schnick, hall rent to July 10, \$25; A. T. Michell for advertising for tenders for bridges, \$2.25; J. B. Brant for registering deed, \$3; Jno. Fisher, R. Div. 3, 40 hrs. scraping @ 40c, \$16. Carried.

Moved by Mr. Juhlke, seconded by Mr. Durham, that the Reeve be authorized to ascertain the amounts of the fence viewers accounts and to issue cheque for same. Carried.

Moved by Mr. Durham, seconded by Mr. Juhlke, that this Council do now adjourn to meet again at Brant's Hall, on Monday, Aug. 7, 1916, at 1 o'clock p.m. Carried.

F. W. ROBERTS, Clerk.

NOT BEST TO FERTILIZE CORN IN THE HILL

Farmers will be tempted this spring more than ever before to fertilize corn in the hill because of the high prices of fertilizers caused by the European war but this practice is false economy, according to Director C. E. Thorne of the Ohio Experiment Station. He explains that while a spoonful of fertilizer applied in the hill may give the corn a good start, spreading fertilizer over all the ground will be more profitable in the long run.

Since the roots of the plant extend out several feet around it, the fertilizer can be utilized better by the plant if spread over all the feeding surface. A spoonful put in the hill can be used by only a few roots close to it. Director Thorne says, "The plant roots can no more perform their full office around a single spoonful of fertilizer than can a swarm of bees all their hive from one clover blossom, even though that blossom stood in an inexhaustible fountain of nectar."

Then again, corn cannot use all the plant food, and following crops will make best use of the fertilizer when it is spread evenly over the field. The increase in yield of these crops is often nearly as much as that secured in the crop fertilized. In one experiment at Wooster fertilizer has been

applied only to wheat. The fertilizer has caused an increase in yield in the other four crops in the rotation of 36 per cent. of that secured in the wheat crop. In a similar experiment at Strongsville, Ohio, this increase has been 27 per cent. When fertilizer is put only in the hill of corn it is out of reach of 99 plants in every 100 of the small grains and grasses which follow the corn.

LIME SULPHUR VS. SOLUBLE SULPHUR FOR SCAB CONTROL

Three spray mixtures are in very common use for scab control: Lime Sulphur, Soluble Sulphur and Bordeaux mixture. The latter mixture is by many considered the most efficient fungicide of the three, but owing to the fact that rusting of the fruit has been very often results, it has somewhat lost in favor. The preparation of the mixture also is somewhat inconvenient unless prepared some time in advance. For use on potatoes and grapes however, for the control of blight on the former and mildew on the latter, it still stands easily first. At the present time also the price of copper sulphate, the most important ingredient of Bordeaux mixture, is practically prohibitive, it having risen about 300 per cent in price since the beginning of the war.

Soluble sulphur is the most convenient material to use, the powder being very readily dissolved in water.

by barrels to the barrel of fruit produced was obtained. In 1914 fifty-two and one-sixth barrels of apples from the trees sprayed with soluble sulphur had 1,551 apples with scab on them or an average of 29.7 scabby apples per barrel of fruit picked. The same year ninety-seven and one-half barrels of fruit sprayed with lime sulphur contained only 165 scabby apples or an average of 2.7 apples with scab per barrel. In 1915 the crop of fruit was negligible, and consequently no data is available on either material for scab control. The injury to foliage and fruit was also noted. At no time was it severe enough to be measurable. It can, however, be said that those trees sprayed with lime sulphur had a more thrifty appearance and green color.

LOYALLY COMMEMORATING IM- MORTAL FAME AND GLORY OF WILLIAM OF ORANGE

The glorious 12th, glorious in his-
tory and glorious in weather was cele-
brated in St. Catharines, Wednesday
with one of the most notable demon-
strations in the history of the local
Orangemen. The city was made the
Mecca of Orangemen for the day and
all believers in the cause turned out
to do honour to the visitors. The
Wednesday half holiday arrived at
the right time many of the stores
closed; many who otherwise would
have been unable to participate in the
great celebration were on hand. The
members of the Loyal Orange Lodge,
True Blues, Lady Orange, Juvenile
Orange and Young Britons with their
many branches and bands were
present and all helped in making the
celebration the success that it has
been already termed.

Shortly after eight o'clock in the
morning the Orangemen began to ar-
rive in the city with their bands and
they brought with them a holiday spir-
it. Short parades were seen during the
course of the morning as the lodges
marched to their various head-
quarters, the streets being crowded
with the Orange be-ribboned men and
ladies. The spectators were also out
in large numbers and lined up along
the sides of the street as the parade
passed.

At 11 o'clock the lodges from Hamil-
ton, Niagara Falls, Rochester, N. Y.,
and other points arrived in the city
and made a fine showing as they pro-
ceeded to their headquarters in the
city to the music of the life and drum
and brass bands. Practically all the
expected visitors had arrived on the
scene at noon and all expectations as to
the number that would be on
parade were filled. There were over
75 lodges on parade. The Scarlet
Knight's drill Corps of Hamilton at-
tracting much attention.

Monster Parade

The celebration opened with the
monster parade which formed at the
Market Square at one o'clock. Un-
doubtedly this parade was one of the
largest seen in this city for many
years. It was stated by those in
charge that the parade exceeded in
magnitude the parade of Orangemen
in this city four years ago. In all
features it is taking on the appear-
ance of a great success. Marching to
the music of the numerous bands the
4,000 orange ribboned men and ladies
in autos, made a splendid appearance
as they marched along the hot streets
of the city.

The line of march was from Church
to Ontario to St. Paul to Queenston
to Church to James to Welland and
thence to the LaCrosse grounds where
the sports were held. Along the line
of march the streets were crowded
with interesting spectators. Many
flags and banners greeted the various
lodges as they marched along, the
flags were seen everywhere and over
the streets banners were flying bear-
ing such signs as "Welcome," "Equal
Rights to all," "Special Privileges to
None," "A United Canada," "One
School, One Flag," and others, these
pleased the marching thousands as
shown by the smile that grew larger
as the banners came into view.

The applause of the many specta-
tors also cheered the paraders along
as the sun unmercifully beat upon
them. However the sun appeared to
only cause the Orangemen to enjoy
better the great day that they were
celebrating.

Taken altogether the opening of the
celebration was one which will long
remain a subject of comment in the
city. The local and visiting lodges
made splendid showings and did them-
selves proud in the capable manner
in which they marched.

At 1:30 o'clock the parade marched
off from the market square in the
following order:

HORSELESS FARMS LONG WAY OFF

Some prophets and sons of pro-
phets who predict that horses on the
farms will soon be only a memory
will have passed away, and pleasing
epitaphs will be carved into the
stones which mark their resting
places, long before their prophecies
become fact. The introduction of the
farm tractor will not, as some believe
remove the horses from the fields and
from their pastures, "Farm Machin-
ery" asserts.

The advent of street cars did not
have that effect upon horses, neither
did the bicycle nor automobile. Today
there are more horses in this country
than there were ten years ago, and
prices are considerably higher.

The one thing that the farm tractor
will do is to supply the need of power
on the farms which horses cannot
give. Take away the farm tractors
which are in use today and several
hundred thousand horses would
be required to replace them, or if horses
could not be had the lands would
have to go uncultivated and untillied.

The number of tractors now in use
will be multiplied many times within
the next ten years, but there will be
as many horses in this country as
there are today, and prices will be
even higher than now.

Farm tractors are becoming a nec-
essity, just as electric street cars
have become—the same as telephones
have supplanted the telegraph in a
way and have taken the place of
messenger boys and quick delivery of
mail. No one will agree that there are
not more miles of telegraph wire in
use today than ten years ago, nor can
it be said that there are fewer mes-
senger boys, yet the telephone is in
almost every business house and in
many households, doing work for
which there was little demand a few
years ago.

The farm tractor will simply fit
into the greater needs of the country
and will do the heavier chores and
drudgery which horses are little fit
for. They will not replace the horses,
but will simply assist them and make
life easier for them. They will also
enable farmers to breed better horses
because their mothers will be kept
for that purpose instead of spending
half or more of their time in doing
heavy work. Let us not dream too
long upon the practicability of the
horseless farm. It is a long way off,
as yet.

THE HORSE'S POINT OF VIEW IN SUMMER

If a horse could talk he would
have many things to say when sum-
mer comes.

He would tell his driver that he
feels the heat on a very warm day
quite as much as he if he could read
a thermometer.

He would say: "Give me a little
water many times a day, when the
heat is intense, but not much at a
time if I am warm; if you want me
to keep well don't water me too soon
after I have eaten."

He would say: "When the sun is
hot and I am working let me breathe
once in a while in the shade of some
house or tree; if you have to leave
me on the street leave me in the shade
if possible. Anything upon my head,
between my ears, to keep off the sun
is bad for me if the air cannot cir-
culate freely underneath it."

He would talk of slippery streets
and the sensations of falling on cruel
city cobblestones—the pressure of
the load pushing him to the fall, the
bruised knees and wrenched joints,
and the feel of the driver's lash.

He would tell of the luxury of a fly
net when at work and of a fly blanket
when standing still in fly season, and
of the boon to him of screens in the
stable to keep out the insects that
bite and sting.

He would plead for as cool and
comfortable a stable as possible in
which to rest at night after a day's
work under the hot sun.

He would suggest that living
through a warm night in a narrow
stall neither properly cleaned nor
bedded is suffering for him and poor
economy for the owner.

He would say that turning the hose
on him is altogether too risky a thing
to do unless you are looking for a
sick horse. Spraying the legs and feet
when he is not too warm on a hot day
he would find agreeable.

He would say: "Please, please out
my eyes and nose and dock when I
come in tired and dusty at night, and
also sponge me with clean, cool water
under the collar and saddle of the
harness."

WEANING THE FOAL

If the foal has been properly cared
for during the summer months, being
fed a little grain in addition to the
roughage and dam's milk, weaning
time will be merely a matter of sepa-
ration.

The time of weaning will vary with
conditions, but the best rule is to al-
low it five to seven months as the
work of the mare varies from heavy
to light, but if possible don't wean
the foal before four months.

The important stage of the young-
ster's life is now at hand. Separation
from the dam must be complete in a
satisfactory, and the colt kept in a
small lot fenced either with boards
or poles. While all colts may not run
into the wire, the one that tangles
itself in the wire is invariably the
most valuable.

The weaning that is most success-
fully accomplished is the least trou-
bled with growth. If at weaning time
the colt can eat half full allowance of
grain, 2 to 3 pounds of oats or 1 1/2
pounds of oats and 2 pounds of ground
barley mixed together, with plenty of
clean alfalfa or timothy hay, it will
continue growing and cease to fret
for its dam.

Weaning time is the best time to
gentle the youngsters. Catch them,
handle carefully, halter them and
teach the milo lead. Also inspect their
feet and gentle them in regard to
handling the feet. If colts are care-
fully handled a few times each day
for several days, it will greatly
simplify the breaking later on.

Eighty-five thousand and satisfied owners against unproved claims and rosy promises

You judge a man by what he's done—not by what he
says he intends to do. Judge a motor car the same way.

Eighty-five thousand and more Canadian built Fords
have "made good" in actual service. Since 1904 this
sturdy, economical car has stood the test—not only in
Canada, but throughout the British possessions.

Every passing year has seen Canadian Ford sales
mount by thousands of cars—because, under almost
every conceivable condition, the car has proved itself
a splendid all-round utility.

It has sold on its record for dependable and economical
performance—not on the rosy promises of its makers.
The man who selects a Ford is backed in his judgement
by more than eighty-five thousand satisfied motorists
in the Empire.

Has this a significance for you?

LIME CAUSES INCREASE IN CROP YIELDS

As an average of 10 crops of wheat
in the five-rotation at the Ohio Ex-
periment Station, an expenditure of
\$5 for lime once in the rotation has
resulted in an average gain of \$1647
an acre for all five crops according
to results reported in Bulletin 288 on
Wheat Experiments just published by
the Experiment Station at Wooster.

From one to two tons of ground lime-
stone is applied per acre in the
spring to the corn crop.
Liming has returned 302 percent on
the investment where nitrogen in
complete fertilizer was carried in
nitrate of soda. It has returned 261
percent when used with manure, and
234 percent in connection with acid
phosphate alone, and has even paid
when used with basic slag. On the
